第一屆「關懷弱勢社群—全港創新科技設計大賽」- 德國遊學團

Innovative Technology Design Competition organized by Lok Sin Tong
Study Trip to Germany

As the champions of the captioned competition, our school was awarded a free trip to Germany. Jacky Ho Hin Wa 6E, Jenson Or Cheuk Yin 6E and Cyrus Yam Ho Wang 4C, together with our teacher, Ms. Yau Bik Kan Brenda, set off for Germany on 17 December and returned on 24 December 2019.

The trip to Germany was eye-opening. As the theme was STEM, we were given lots of opportunities to get in touch with some state-of-the-art technology. The first highlight was the visit to The Deutsches Museum. With over 100,000 objects from the fields of science and technology, The Deutsches Museum is one of the most important museums of science and technology anywhere in the world. The collections include objects from mining to atomic physics, and cryptography to a model of a human cell. We spent half a day there, and realized that there just wasn't enough time to see all the things we wanted to see!

Another highlight that our boys will never forget was the trip to the Mercedes-Benz Museum and BMW Museum. The Mercedes-Benz Museum brought every visitor back to the over 120-year history of the automobile and this firm, in the form of stunning designs of vehicles, illustrating Mercedes through the years. We learned how the automobile had made such great improvements over the years. We could also take a look at the cars driven or used by famous people such as Princess Diana. At the BMW Museum, we were fascinated by the wonderful presentation of the company, and the product history of BMW. There were plenty of valuable and attractive automobiles, motorcycles, and engines displayed in the museum. We all enjoyed the in-depth insights into the past, present, and future of the automobiles.

Apart from the exposure to STEM, we also met many new friends on this tour. The trip was comprised of 3 students from two primary schools and two secondary schools. Despite the age gap, everyone was able to make friends with each other happily. We felt grateful that our boys always took care of the younger brothers and sisters. Such friendships are priceless.

We will never forget the sausage, the German pork knuckle, as well as the picturesque scenery and delightful people there. It was a once-in-a-lifetime experience. Last but not least, we would like to extend our deepest gratitude to Ms. Brenda Yau for leading us, not just on the trip, but also throughout the preparation of the competition. We would like to thank the school for its endless support of student activities too!
